Hydraulic Excavators
XE160WE

Agder Gruppen
Telefon: +46 (0) 8 20 11 70
Adress: Symmetrivägen 29 B, 196 37 Kungsängen
Öppetider: Måndag – fredag kl. 07 – 16
E-post: post@agder-gruppen.se

www.agder-gruppen.no/sv/stockholm/

Rated Power: 115 kW
Operating Weight: 15800 kg
Standard Bucket Capacity: 0.6 m³

INTRODUCTION OF XCMG

XCMG, as a leading enterprise valued of 100 billion RMB, with the largest scale, the best technology level, the largest export volume, and high competitiveness and influence in China's construction machinery industry, has been occupying the first place in China's construction machinery industry for decades, and it now ranks the third in the world industry and the 395th among the world's top 500 brands.

The main products by XCMG consists of 16 categories of equipment such as hoisting machinery, excavation machinery, concrete machinery, mining machinery, earth-moving machinery and road machinery, etc., as well as three categories of key components such as hydraulic system, transmission system and electric control system. Among above-mentioned, hoisting machinery ranks first in the world, and package solution of road construction and maintenance machinery, piling machinery and concrete machinery are among the first-class bloc in the world.

XCMG has accumulated more than 8000 approved patents, including more than 1900 invention patents and more than 130 PCT international patents. Entities of R&D centers, manufacturing plants or KD factories are in operation in more than 10 countries such as Germany, the United States, Brazil and India, XCMG has also acquired three European enterprises including Schwing in Germany. The Brazil manufacturing plant, with an investment of 350 million dollars to build up factories on a bare ground, has become a model of economic cooperation between China and Brazil. At present, XCMG products are exported to 187 countries and regions, covering 97% of the countries along "The Belt and Road" area. In export business to 35 countries, XCMG's proportion ranks NO. 1, with a steady first place within Chinese industry in terms of annual export volume and overseas income.

XCMG IN EUROPE

Since 1990s when XCMG was already a known brand within the industry in Europe, XCMG has been one of the major international manufacturers supplying products and service across the Continent. With its rapid development in recent years, XCMG is gradually building up an all-round network including: R&D department; local distribution, supply chain management and an integrated customer services and training center.

At present, XCMG has 3 subsidiaries in operation, with more than 100 multinational employees in Europe:

-ERC XCMG European research center GmbH

-EPC XCMG European purchasing center GmbH

-ESS XCMG European sales and services GmbH

XCMG is also holding a resource of more than 100 branches by local dealers throughout the Europe, generating a whole value chain that is serving the entire European market, including sales, service, financing, used equipment recycle, etc.

We actively and continuously implement our globalization strategy. Our first-class international team has many years of professional experience and excellent cross-cultural management capability.

With a strong combination of expertise and practical experience in a multicultural context, we create real value and provide a high level of return on investment to our European customers.

XCMG XE160WE Stage V builds on its reputation from the previous series based on quality, reliability and durability. The enhancements deliver better fuel efficiency while not compromising on power, reducing emissions and consumption while increasing productivity.

If you want to get your work done with a durable brand, you can trust XCMG and look no further than our XE160WE.

► **RELIABILITY:**

Even under the harshest conditions, XCMG has made its aim to build long-life products. XCMG has a long term relationship with the best component suppliers in the world. Cummins engines, Kawasaki hydraulic main pump/main valve/swing motor, and high-quality travel motor guarantee you the best performance. Ultra-sized cylinders in combination with long-life reinforced pins, polymer shims and bushings ensure best performance with unchanged durability.

► **PRODUCTIVITY AND EFFICIENCY:**

Strong and unmatched bucket and arm digging forces give XE160WE the ability to fulfill the most challenging tasks on your jobsite with excellent productivity and efficiency.

► **SAFETY SOLUTIONS:**

Standard equipped with rear and right side cameras, large side mirrors, powerful LED lighting, anti-slip steps and platforms and handrails for safe access to the upper structure. The ROPS (Roll Over Protective Structure) and the OPG (Operator Protective Guard) cabin ensures the operators' safety.

► **VERSATILITY:**

Multiple boom and arm sizes together with special configurations are available which is capable fulfill any of tasks that customer requires.

► **EASY-TO-USE ATTACHMENTS:**

Programmable auxiliary lines AUX1 (single and dual way) and AUX2 are provided to support your hydraulic attachments like grabs, shear, hammer, etc.

► **COMFORTABILITY:**

In order to provide a comfort operation environment, we offer a spacious cab with low noise and vibration levels and excellent all-round visibility. Meanwhile, fully adjustable air suspension heated seat and air conditioner as standard.

► **CONTROLLABILITY:**

8 attachments modes, proportional control with user-friendly 8" TFT LCD color monitor.

► **STRONG POWER:**

The Cummins B4.5 stage V engine is exceptionally powerful - with high torque at low revs. This makes that maximum flow is already available at low rpms with a fuel-efficient engine regime.

► **ADVANCED FILTRATION:**

Easily accessible highly efficient filters and cleaners that remove all contaminations from your jobsite protect your investment in the best possible way.

► **SIMPLE AND EASY MAINTENANCE:**

Easy access to all compartments. Maintenance data and signs are directly available from monitor.

► **UNDERCARRIAGE DURABILITY:**

The CAE designed D-shape undercarriage enables even weight distribution, increases stability and durability, and prevents damage from rocks and debris.

Excellent Performance and Fuel Economy

► Power without compromise

The XE160WE makes the operation tasks more efficient and comfortable.

Equipped with a new large diameter multi-way control valve, and Kawasaki hydraulic system. Valve element is further optimized to reduce internal pressure loss of the channel, improve maneuverability and efficiency of the composite operation.

POWER MATCH TECHNOLOGY

The XE160WE is equipped with a Cummins B4.5 engine. Famous for its excellent fuel efficiency, reliability and long service intervals it combines exceptional power output and high torque at low revs.

It meets EURO stage V emission regulations. It achieves the best fuel injection control, improve combustion efficiency, and is more energy-saving and environmentally friendly.

Adopting pre-filter and high performance direct current air filter, air intake management, and innovative use of linear air flow path, gray scale is higher. Achieving longer service life of filter and longer maintenance cycle, and reducing replacement cycle of filter and overall maintenance costs.

XCMG's wheeled excavator designed to reduce fuel consumption and increase your productivity. With advanced technology, save your time and cost.

FUEL ECONOMY TECHNOLOGY

- A choice between 8 working modes guarantees optimum performance under all conditions.
- Electronic control of fuel consumption.
- The auto-idle function reduces the engine speed when the controls are inactive for a preselected amount of time or when the safety lever is switched off. The engine will immediately return to its original selected speed when the operator touches the controls.
- For optimum cooling the fan speed is controlled by a viscous clutch that results in lower fan noise with better fuel efficiency.
- For increased fuel efficiency ECO mode turns on automatically, which reduces your fuel consumption while maintaining productivity.

Easy hydraulic maintenance:

- 2000/4000 hours of hydraulic oil replacement (depending on the hydraulic oil type)
- Replace the hydraulic oil return filter after 500 hours
- Replacement of the hydraulic oil suction filter element after 2000 hours

Less engine service:

- 500 hours engine diesel filter replacement
- 500 hours engine oil and filter replacement
- The long service intervals guarantees limited downtime.

First Choice for Comfort

The XE160WE cabin is designed to support increased productivity with a spacious comfortable operator environment. The pressurized cab is ISO-certified for your safety and offers a comfortable heated fully adjustable suspension seat with several storage compartments and a clear all-round view of your jobsite. The reduced noise and vibration levels with automatic air-conditioning will make your work day easier and comfortable.

Safety

Cab with ROPS can be equipped with top protection, front protection, side protection to meet anti-falling requirements, and thus to further improve cab safety.

Advanced control technology

Ergonomic, advanced and simple-to-operate proportional joystick delivers ultra-precise and smooth control over all movements. The orientation of the joystick's rollers and buttons are adjustable.

Air conditioning

High-power cold and warm air-conditioning, equipped with multi-channel stereo air supply system and advanced sound system, it is convenient and comfortable for all kinds of operation at your fingertips.

Integrated and centralized electrical system control

Concise design and reliable system. Electrical plug-in components with the world's first-class quality reaches the waterproofing grade of IP56 and are more reliable.

HMI

All machine interfaces – including the joysticks, keypad and LCD monitor – are ergonomically positioned and designed for optimum control and efficiency. For operator convenience and ease of use, the number of switches has been significantly reduced.

Cab suspension

High-performance silicone oil shock absorber with internal damping spring will effectively isolate shock waves in specific frequency bands for improved comfort.

8-inch LCD

8-inch color LCD display has higher resolution, larger viewing angle, optimized display interface, and its style is more in line with the application environment. Equipped with one-click fault inquiry and other functions, the operation is more convenient, and there is more monitoring information which can ensure better operation of the machine.

- 1 Spacious operator's space
- 2 Large travelling pedal
- 3 Heated air suspension seat
- 4 Power outlet
- 5 Throttle dial
- 6 All around AC and heating
- 7 (Bluetooth) AM/FM radio
- 8 Proportional hydraulic joysticks
- 9 High quality speakers
- 10 Hammer control pedal
- 11 Color LCD monitor
- 12 Storage compartment (1 out of 7)
- 13 Safety lever
- 14 Cup holder

Machine interfaces

All machine interfaces – including joysticks, keypad, panel, and larger LCD monitor – are ergonomically designed for optimum control and efficiency, resulting in increased productivity and workplace wellbeing. The switches have been simplified and climate control is now integrated into the keypad for easy adjustments.

- The new multi-function 8" LCD monitor displays a comprehensive range of useful technical information, allowing you to check the machine's status and settings at a glance.
- Highly sensitive and low-effort joysticks and clear convenient controls enable you to work smooth and safely with minimum effort for increased comfort and efficiency.
- The newly adjustable proportional auxiliary functions support precise and smooth control of your attachments.

INTELLIGENT MONITOR

The upgraded 8" TFT monitor features a day and night display with full-user access to the machine settings and maintenance data. Any abnormality is clearly displayed on the screen, allowing you to work safely and confident with an accurate overview of all conditions.

Pre-cleaner

Pre-cleaner:

Air filter life and engine efficiency are directly related to the amount of debris ingested through the engine's air intake. Therefore, the pre-cleaner (as standard) is the first stage of an air intake system that prevents entry of the majority of heavier-than-air particles.

► Designed for long-term robustness and safety

XCMG has developed one of the most rigorous strength and reliability testing procedures, The XCMG E-series features durability under the most extreme conditions and is therefore one of the most popular brands in its home market.

We continually manufacture the most durable machines in order to reduce the cost of ownership. The robust upper frame, undercarriage structure, and front attachments show their real value in tough working conditions and guarantee higher productivity.

REINFORCED DURABILITY OF THE D-CHASSIS

The D-shaped undercarriage has a higher durability than demanded on the jobsite, as proven through numerous tests including road tests and virtual simulation.

HI-GRADE (HIGH-PRESSURE)HOSES

The E-series uses a new type of high-pressure hoses with improved heat and pressure resistance to increase the durability of the machine.

STRENGTHENED BOOM AND ARM

FEA has been used to calculate the best load distribution throughout the machines structure. For better protection of the base of the arm, reinforced bars have been added. The arm structure has been strengthened for the roughest conditions.

UNDERCARRIAGE DURABILITY WITH EASY MAINTENANCE

Chassis is parallel with dozer blade and auxiliary stabilizing outriggers: Dozer blade is designed to maintain the machine's stability

Excellent driving performance: With high/low/slow gears provided, the vehicle can adapt to complex terrain with its super high traction

PRODUCTION EFFICIENCY:

Two-piece boom working device and a variety of optional attachments can maximize the utilization rate of equipment

► Excellent serviceability

Our machines are designed for simple routine maintenance, while skilled XCMG technicians are available to provide extra support if needed. To get the most out of your machine, choose the package you need from a broad range of service agreements. Uptime, productivity and residual value are all maximized, making the XE160WE an economical and rewarding choice.

Simple and easy maintenance

- Complete your daily machine checks entirely from the ground, minimizing the need to access the upper platform.
- A large guard rail is installed along with anti-slip steps and plates, for safer and easier access to the upper structure
- The cab's air-conditioning filter is lockable and placed on the cab's side for easy access
- A battery cut-off switch to easily disconnect the battery for jobsite required safety measures.
- Shut-off valves on the pre-filter piping line and the fuel tank drain piping makes servicing easier and prevents pollution from leakage.
- The engine parts can be reached easily via the top and side panels
- For extra accessibility and servicing convenience, all filters (engine oil filter, fuel pre-filter, fuel filter and hydraulic pilot filter) are located in the pump compartment.

Pre-start monitoring system

The XE160WE has a pre-start monitoring system that shows you coolant temperature, hydraulic oil temperature, engine oil pressure, fuel levels and AdBlue® level. It will also show fluid and filter intervals to keep the machine in top performing condition.

Proactive maintenance solutions

- Routine maintenance: your dealer will support you with routine service at regular intervals.
- Genuine parts: manufactured and tested to ensure long lifetime of your machine.

SCR tank and easy diesel filling

The ECU (Engine Control Unit)monitors with sensors the AdBlue® system and warns the operator for potential system malfunctions. Fuel filler pump, an on-board pump system, lets you fill your fuel tank quickly from an external source (like a fuel drum) – the system stops automatically when the fuel tank is full or the fuel source is empty.

Centralized lubrication greasing points

Electrically centralized lubrication makes daily maintenance easier and more convenient

New Cooling System with Increased Air Flow

The lubrication points of the working equipment adopts the self-lubricating bearing with ultra-long lubrication periods and is centrally arranged to make lubrication easier. Specially the optional electric automatic lubrication system cover all lubrication points of work devices and swing bearing.

Technical Specifications

Engine

Designed to deliver superior performance and fuel efficiency, the Cummins Stage V diesel engine fully meets the emissions regulations. To optimize machine performance, the engine uses high-pressure fuel injectors, aVGT™ turbocharger inter-cooler, and electronic engine controls. 4-cycle water-cooled, turbocharged, Exhaust Gas Recirculation (EGR) and/ Selective Catalytic Reduction (SCR) without aDiesel Particulate Filter (DPF).

XE160WE	
Model	Cummins B4.5
No. of Cylinders	4
Rated Power at 2000 rpm	
(SAE J1995)	115 kW (154 hp) at 2000 rpm
(SAE J1349)	—
(ISO 9249)	—
Max. torque at 1200 rpm	712 N·m (525 lb·ft)
Piston Displacement	4.5L (275 in³)
Four Stroke	√
Batteries - Alternator	2 × 12 V, 100 Ah -24 V / 70 A
Air Filter	"Donaldson's the latest PSD air filter and pre-filtered dust separator"

Chassis system and shield

Extremely robust construction throughout - made of high-quality, durable materials, with all welded structures designed to limit stresses. The machine's forward, neutral, reverse and high/low gears are located on the right joystick side, which is in line with the operation habits of road equipment, and has CCS cruise control and slowdown functions. Three-stage front axle swing control mode (on/off/auto) can provide better driving performance in terms of operating conditions. High-quality gearboxes and heavy-duty axles ensure that the drive system is more suitable for the application of wheeled excavators in complex environments. Wheel brake system makes machine braking more efficient.

XE160WE	
Front Drive Axle With Steering	√
Rear Rigid Drive Axle	√
10.00-20 Tire	4
Outrigger And Dozer Blade With Guard	√

Hydraulic system

The XICS (XCMG Intelligent Control System) is the brain of the excavator - minimizing fuel consumption and is enabling the efficiency of the hydraulic system to be optimized for all working conditions. To harmonize the operation of the engine and the hydraulics, the XICS is connected to the engine's electronic control unit (ECU) via a data transfer link.

- The hydraulic system enables independent and combined operations-3-speed travel offers either increased torque or high travel speed
- Cross-sensing pump system and auto-deceleration system improves fuel efficiency.
- 3 power modes and 8 working modes, -flow and pressure control of auxiliary hydraulic circuits from the control panel
- Computer controlled pump flow control
